Art Unit: 1775

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 34, 37 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. While the original specification is enabled for a coating having an inverse spinel, it does not reasonably provide enablement for a coating with both a normal spinel and an inverse spinel layer as now claimed.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 32 is rejected under 35 U.S.C. 102(b) as being anticipated by Toyota (JP 63-274751) or Friese et al (5,310,575).

Art Unit: 1775

Toyota discloses a spinel mixed with the claimed metal oxide, like zirconia, on the claimed metal substrate. Friese et al discloses a spinel mixed with a metal oxide, like alumina on the claimed substrate.

5. Claims 32 is rejected under 35 U.S.C. 102(e) as being anticipated by Hasz et al (5,914,189 or 5,773,141)

Hasz et al discloses a mixture with a spinel and the claimed metal oxide on the claimed metal substrate (for '189 see column 4, lines 48-52, and for '141, column 4, lines 1-30).

6. Claims 33,35,36 are rejected under 35 U.S.C. 102(e) as being anticipated by Kimura et al (5,840,380).

Kimura et al discloses the claimed spinel mixed with the claimed metal oxide on the claimed metal substrate (abstract).

7. Claims 33,35,36 are rejected under 35 U.S.C. 102(b) as being anticipated by Anderson et al (5,340,783) or Rowcliffe et al (4,913,980) or GE (EP 0 608 081) or Norton (GB 745 257) or Hornberger (4,564,555).

Anderson et al or Rowcliffe et al or GE or Norton disclose a claimed spinel mixed with the claimed metal oxide on the claimed metal substrate. In Hornberger a mixture of titania and the claimed metal oxides anticipated the claimed invention (column 3, lines 64-66).
